119-2830-SR	V.D.O. Sending Unit. For late model G.M. Gauges 0-90 Ohm
419-2840	1931-54 Chevrolet Fuel Sending Unit. 0-30 Ohm

This unit is 100% U.S. made, and will fit 6" to 24" deep tanks. It's very easy to adjust the height. It has the 5-screw pattern, same as original, and is designed so you can use it in the stock Chevrolet tanks or our new stainless tanks. This will work for the restorer using his original gages, or the street rodder wanting to keep his original gages. It operates on 6-volt or 12-volt.

119-2860-SR	Sending Unit Gasket. Fits stock Chevrolet, Stewart Warner, V.D.O., Classic, and Sun Senders
